

Carol is a Brazilian graphic artist and collage artist. She holds a degree in fashion design and another in Art History, something that has directly influenced her work as an artist. Since 2012 she has been working with digital and analogue collage, creating graphic solutions for several projects in partnership with a number of well-known professionals from the Brazilian editorial market, graphic design studios, advertising agencies and brands. In collage she found her path to create narratives and visual poetry. Carol likes to mix images from the past with miscellaneous elements, creating new universes. Her aim is to always bring a contemporary perspective to the past and to the memories around her.
