

Nicola Magri is an illustrator and 3D visual designer based in Bologna, Italy. He was born and raised in Brescia but has always liked to travel, therefore after his graduation, he moved to London where he worked in the architecture field. After this experience, he moved to Milan and then to Bologna. Drawing has been his greatest passion since he was a child. Nicola sketches his ideas on paper before finishing them off digitally in photoshop. His illustrations begin with a thought, which can originate from everyday life, books or a particular event. From this starting point, he develops the image that is then titled with a keyword, giving the observer the freedom to interpret it. In his free time, he likes to hang out with his friends, enjoy the sun and have a good laugh.
